## What are the risks of investing?

Risk indicator for AE KiwiSaver Plan -

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek advice or work out your risk at: <https://www.sorted.org.nz>

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past five years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

## Notes

1. The after-tax return is sometimes higher than the pre-tax return, this is a result of volatile tax obligations attributed to the investments during the year and over 5 years. The impact of tax credits this way is uncommon and should not be expected.
